

## PROTECTOR Strong Tape

**PROTECTOR Strong Tape** is a modern version of barbed wire, designed to form effective physical barriers.

**PROTECTOR Strong Tape** is made of high-tensile galvanized steel tape 45 mm wide and 0,50 mm thick. Both sides of the tape feature aggressive blades and side spikes.

**PROTECTOR Strong Tape** is additionally enforced on the blades and between them for higher efficiency.

There are openings in the centre part of the tape, facilitating installation on fences.

A special system of reels allows easy storage and transportation or quick installation on the ground or other existing fences. The amount of the tape on a reel is only limited by logistic and assembly capabilities.

**PROTECTOR Strong Tape** can be used with the alarm systems or electric deterrent systems. The tape can be assembled with hand tools or special pneumatic devices.
