

PROTECTOR Tape

PROTECTOR Tape is a modern version of barbed wire, designed to form effective physical barriers. It can be used as PROTECTOR Mobile Barrier or installed on the ground or other existing fences.

PROTECTOR Tape is a solid and effective barrier for securing a variety of buildings and areas.

Modern and simple structure of **PROTECTOR Tape** ensures efficient and permanent protection. It is made of galvanized steel tape 0,50 mm thick of a high mechanical resistance. The galvanized layer is minimum 100 g/m² thick.

Aggressive blades and additional spikes ensure high efficiency of the barrier despite its simple structure.

Depending on the level of aggressiveness there are three types of blades

- PROTECTOR Short
- PROTECTOR Medium
- PROTECTOR Long

PROTECTOR Tape is stored on special reels. The amount of tape on a reel depends on customer's needs and is limited by logistic and assembly capabilities only.

PROTECTOR Tape can be used with alarm systems or electric deterrent systems.

The tape can be assembled with hand tools or special pneumatic devices.
