

## Personal Armour System Plates for Bulletproof Vest

### KEY FEATURES:

- **lightweight** - made with highly mass efficient ceramics like Silicon Carbide and Dyneema®
- **multihit capabilities** - protection against multiple rounds, while minimizing blunt trauma.  
Provides safety from secondary fragments upon impact
- **resistant** to UV radiations, water, sunlight and extreme temperatures
- **durable** – the plate may be dropped on the strike face without ballistic degradation.  
Plates do not crack
- **ultimate protection** of torso and vital organs
- **available** in size 25x30 cm for front and back plates (interchangeable) and 15x20 cm for side plates
- **comfortable** - multi curved geometry that optimize the fit and comfort of the user, type SAPI
- **designed** to NIJ 0101.04 standard requirements
- **plates** are also designed to meet specific requirements and threat level (bullet types) specified by user

Since types of bullets and calibers vary significantly with geographic locations, therefore further information related to our offer may be presented on receipt of specific requirements regarding level of protection or type of ammunition.
